What do we know about A.I.?

Chat GPT Exercise

What is A.I.?

Machine Learning

Examples: Social Media,
Chatbots, Autonomous
vehicles, etc.

Artificial Intelligence: systems capable of performing tasks that typically require human intelligence. These tasks empower machines to simulate and sometimes **exceed human cognitive abilities.**

Why A.I. in safety?

Risk Management: AI can help identify potential hazards by recognizing patterns.

Efficiency: Maximize working man hours

Data Analysis: Processing data for actionable insights.

Conversational A.I.

A.I. in safety today?

- Sensors and Cameras: Recognize site and behavior conditions.
- Machine Learning: Analyzes data to identify patterns and potential safety risks in the future
- Alerts and Notifications: Automated warnings for safety violations or hazards.

Types of A.I. in safety?

Predictive Analytics: Forecasting potential safety issues based on historical data.

Computer Vision: Visual recognition for monitoring and detecting safety violations.

Hardware Technology: Smart safety gear with monitoring capabilities.

Applications in safety?

Hazard Detection: Identifying potential risks on the construction site.

Equipment Monitoring: Tracking equipment health and usage for maintenance.

Worker Safety: Monitoring worker movements and ensuring compliance.

Benefits of A.I. in Safety?

Automated Reports

Conversational A.I.
(Forms & Dashboards)

Lowering Insurance from
comprehensive data

Automating Data Output (Insurance)

LEVERAGE ANALYTICS

TRACKING WORKING
MAN HOURS

Challenges

Costs: Initial investment in AI technology. Price customers out of use.

Data Security: Safeguarding sensitive information collected by AI systems. SOC2 Compliance.

Trust: Ensuring the program is tracking the necessary fields and objectives.

Future of A.I.

Video Compliance: Completely automated cameras recognizing, tracking, and reporting on compliance.

Hardware Devices integrating with Software/A.I.

Constantly evolving (Open A.I.)

KEYPOINTS

A.I. TOOLS BECOME
MISSION CRITICAL

DATA RESOURCES TO
LOWER INSURANCE RATES
AND WORKERS COMP
